Rehoteq AI Curriculum: Secondary (JSS 1 to SSS 3)

Weekly scheme of work, Nigerian 13-week terms

Edition 2.0, Scheme of Work, Session 2026/2027

Rehoteq Technologies | AI Curriculum for Nigerian Schools

How this scheme of work is organised

Nigerian schools run three terms per session, and each term is a 13-week term. This edition follows that rhythm exactly, so the curriculum can drop straight into any school's diary.

Weeks 1 to 10: teaching. One topic per week. Each week carries two periods: Period 1 introduces the new concept, Period 2 is practice, an activity, or project work. The table shows which part of the topic each period takes.

Week 11: examinations. End-of-term examinations. Revision runs through weeks 9 and 10.

External examinations. Every SSS 3 student writes WAEC, NECO or NABTEB at the end of the third term, so the SSS 3 third-term scheme is built around that calendar instead of a normal term: revision clinics in weeks 1 to 3, the external examinations themselves from week 4, and post-exam work (capstone showcase, admissions and certification clinics, valedictory) after the papers. JSS 3 students sit BECE on the same principle.

Weeks 12 and 13: marking and computation. Teachers mark scripts, compute results, and hold results review; schools then close (in the first term, typically by 16 or 17 December).

Sample calendar for 2026/2027. First term: September 7 to December 18, 2026 (teaching ends the second week of December, examinations and marking follow, closure by December 16 or 17). Second term: January 4 to April 2, 2027. Third term: April 26 to July 30, 2027. Schools shift these dates to match their own calendar; the 13-week structure stays the same.

Periods. The scheme assumes two periods per week for AI and digital skills. Where a school gives three periods, the extra period extends the Week 2 project or practice work.

Nigerian context with global relevance

Local first. Every level anchors examples in Nigerian life: POS machines and bank fraud alerts, farm and market data, Lagos traffic, NDPR data rules, WAEC and NECO computer studies.

Global standards mapped in. Secondary work teaches Python, pandas, scikit-learn, HTML/CSS/JavaScript, SQL, Git and cloud free tiers, the same toolchain used in UK, US and Canadian school curricula (CSTA-aligned strands).

Credentials and next steps. The pathway points at Google AI Essentials, AWS/Azure/GCP free tiers, Kaggle, GitHub portfolios and freelancing, with WAEC/NECO topic mapping explicitly built into SSS 3.

JSS 1

First Term

Week	Topic	Subtopics (period 1 / period 2)
1	**Computer and society**	P1: Brief history; computers in Nigeria today | P2: Uses in school, bank, hospital, market
2	**System unit and peripherals**	P1: Parts and their functions | P2: Label and assemble a practice setup
3	**The operating system**	P1: Files, folders, desktop | P2: Organise a practice folder tree
4	**Word processing**	P1: Create, format, save a document | P2: Produce a one-page composition
5	**Internet and email**	P1: Browsing safely; sending mail | P2: Compose and send a practice mail
6	**What is AI?**	P1: Definition and everyday examples | P2: AI spotting walk: list five AI touches
7	**AI in Nigerian services**	P1: Bank fraud alerts, POS, traffic and farm apps | P2: Match each app to the problem it solves
8	**Classification**	P1: Grouping by rules; spam filters | P2: Sort mixed 'mail' into keep and junk
9	**Collecting data**	P1: Class survey into a table | P2: Run and record the survey
10	**Project and revision**	P1: Present the survey | P2: Recap quiz
11	**Examinations**	End-of-term examination on the term's topics.
12	**Marking and computation**	Teachers mark scripts and compute continuous

		assessment and exam scores.
13	**Results and closing**	Results review, records update, school closes.

Second Term

Week	Topic	Subtopics (period 1 / period 2)
1	**Recap**	P1: Quiz on first term | P2: Team quiz
2	**Spreadsheets basics**	P1: Cells, rows, simple formulas | P2: Enter survey data and total it
3	**Charts**	P1: Bar and pie charts | P2: Chart the survey two ways
4	**Scratch: interface**	P1: Stage, sprites, blocks | P2: Explore with a first animation
5	**Sequences**	P1: Step-by-step programs | P2: Build a two-step story
6	**Loops**	P1: Repeats | P2: Dance loop challenge
7	**Variables**	P1: Store and change values | P2: Add a score counter
8	**Conditions**	P1: If-then decisions | P2: Build a quiz that reacts
9	**Number systems**	P1: Binary and decimal basics | P2: Unplugged binary cards: count to 31
10	**Project and revision**	P1: Finish and present a Scratch project | P2: Recap quiz
11	**Examinations**	End-of-term examination on the term's topics.
12	**Marking and computation**	Teachers mark scripts and compute continuous assessment and exam scores.
13	**Results and closing**	Results review, records update, school closes.

Third Term

Week	Topic	Subtopics (period 1 / period 2)
1	**Recap**	P1: Review of second term | P2: Quiz relay
2	**Presentations**	P1: Slide design and delivery | P2: Build and present a three-slide deck
3	**Scratch game**	P1: Build and share a game | P2: Play-test classmates' games
4	**Algorithms**	P1: Definition; everyday examples | P2: Write the algorithm for cooking a meal
5	**Flowcharts**	P1: Symbols and practice | P2: Flowchart the school day
6	**Pseudocode**	P1: Steps in structured plain words | P2: Turn two flowcharts into pseudocode
7	**AI ethics**	P1: Fairness and privacy | P2: Case discussion: the biased model
8	**Digital citizenship**	P1: Netiquette and cyberbullying | P2: Scenario responses
9	**E-waste**	P1: Recycling and health | P2: Design an e-waste poster
10	**Project and revision**	P1: Present the term's work | P2: Recap the year
11	**Examinations**	End-of-term examination on the term's topics.
12	**Marking and computation**	Teachers mark scripts and compute continuous assessment and exam scores.
13	**Results and closing**	Results review, records update, school closes.

JSS 2

First Term

Week	Topic	Subtopics (period 1 / period 2)
1	**Networks and the internet**	P1: LAN, WAN, ISPs in Nigeria | P2: Compare two local data plans
2	**Web browsing and search**	P1: Advanced search; evaluating sites | P2: Rank three results and justify
3	**Introduction to HTML**	P1: Tags, headings, paragraphs | P2: Build an 'About Me' page
4	**Scratch: events and messages**	P1: Broadcasting, interactive stories | P2: Build a choose-your-path story
5	**Data and information**	P1: Types; qualities of good data | P2: Good vs bad data sorting exercise
6	**Python first steps**	P1: print and input | P2: Write a greeting program
7	**AI in the real world**	P1: Speech and image recognition demos | P2: Test two tools; record strengths and errors
8	**Recommendation systems**	P1: How video apps and shops suggest | P2: Trace one suggestion to its cause
9	**Data collection with forms**	P1: Google Forms survey | P2: Run a form survey in school
10	**Project and revision**	P1: Present form results | P2: Recap quiz
11	**Examinations**	End-of-term examination on the term's topics.
12	**Marking and computation**	Teachers mark scripts and compute continuous assessment and exam scores.
13	**Results and closing**	Results review, records

		update, school closes.

Second Term

Week	Topic	Subtopics (period 1 / period 2)
1	**Recap**	P1: Quiz on first term | P2: Team quiz
2	**Python variables and arithmetic**	P1: Numbers and strings | P2: Market price calculator exercise
3	**Conditionals**	P1: if, elif, else | P2: Grading program for test scores
4	**Loops**	P1: for and while | P2: Times-tables generator
5	**Lists**	P1: Store many values | P2: Build a shopping-list program
6	**Functions**	P1: Define and call | P2: Refactor two programs into functions
7	**Scratch to Python**	P1: Same ideas in text | P2: Port a Scratch project to Python
8	**Chatbot logic**	P1: Rule-based bot in Python | P2: Build a question-answer bot
9	**Ethics: AI and honesty**	P1: Deepfakes, misinformation | P2: Spot the fake exercise
10	**Project and revision**	P1: Present your bot | P2: Recap quiz
11	**Examinations**	End-of-term examination on the term's topics.
12	**Marking and computation**	Teachers mark scripts and compute continuous assessment and exam scores.
13	**Results and closing**	Results review, records update, school closes.

Third Term

Week	Topic	Subtopics (period 1 / period 2)
1	**Recap**	P1: Review of second term | P2: Quiz relay
2	**Database idea**	P1: Tables, records, fields | P2: Design a school-record table
3	**Spreadsheets advanced**	P1: Lookups and pivot ideas | P2: Analyse the class results sheet
4	**Machine learning intro**	P1: Examples vs rules | P2: Rules vs examples sorting duel
5	**Training a model**	P1: Teachable Machine: sounds or images | P2: Train a model on Nigerian sounds or images
6	**Testing and accuracy**	P1: Measure how well it works | P2: Score on ten new examples
7	**AI safety**	P1: Scams, fake news, deepfakes | P2: Case analysis in teams
8	**Tech careers in Nigeria**	P1: Roles, skills, pay ranges | P2: Career path mapping exercise
9	**Graphics tools**	P1: Canva or CorelDraw basics | P2: Design a school event flyer
10	**Project and revision**	P1: Present the term's work | P2: Recap the year
11	**Examinations**	End-of-term examination on the term's topics.
12	**Marking and computation**	Teachers mark scripts and compute continuous assessment and exam scores.
13	**Results and closing**	Results review, records update, school closes.

JSS 3

First Term

Week	Topic	Subtopics (period 1 / period 2)
1	**BECE warm-up**	P1: Key ICT concepts revision | P2: Rapid mixed quiz
2	**Algorithms and efficiency**	P1: Best path; sorting cards | P2: Race two sorting methods
3	**Python functions and modules**	P1: Reuse code | P2: Build a maths-helpers module
4	**Lists and dictionaries**	P1: Organised data | P2: Student-record program
5	**Web pages with forms**	P1: Inputs and buttons | P2: Build a feedback form page
6	**AI and society**	P1: Jobs, bias, benefits | P2: Structured debate with evidence
7	**Misinformation**	P1: How it spreads; fact-checking | P2: Fact-check three posts
8	**Data project**	P1: Plan a survey and analysis | P2: Run the survey and chart it
9	**Python mini-project**	P1: Quiz game | P2: Build and demo the game
10	**Project and revision**	P1: Present all work | P2: Recap quiz
11	**Examinations**	End-of-term examination on the term's topics.
12	**Marking and computation**	Teachers mark scripts and compute continuous assessment and exam scores.
13	**Results and closing**	Results review, records update, school closes.

Second Term

Week	Topic	Subtopics (period 1 / period 2)

1	**Recap**	P1: Quiz on first term | P2: Team quiz
2	**Python mini-projects**	P1: Calculator; story generator | P2: Build one and extend it
3	**APIs idea**	P1: Apps talking to apps | P2: Weather API demo exercise
4	**Cloud accounts**	P1: What the cloud is; free student tools | P2: Set up a student cloud account
5	**GitHub idea**	P1: Saving versions of code | P2: Commit and revert exercise
6	**Machine learning: classification**	P1: Train a text or image classifier | P2: Train on local data
7	**Data cleaning**	P1: Fix messy data | P2: Clean a supplied messy dataset
8	**Bias in AI**	P1: Case studies | P2: Diagnose a biased model
9	**Building a chatbot**	P1: Rule-based vs AI-based | P2: Build both; compare behaviour
10	**Project and revision**	P1: Present the chatbots | P2: Recap quiz
11	**Examinations**	End-of-term examination on the term's topics.
12	**Marking and computation**	Teachers mark scripts and compute continuous assessment and exam scores.
13	**Results and closing**	Results review, records update, school closes.

Third Term

Week	Topic	Subtopics (period 1 / period 2)
1	**Final revision clinic one**	P1: BECE syllabus drills on ICT objectives | P2: Past questions practice

2	**Final revision clinic two**	P1: Theory practice with marking guides | P2: Practical preparation
3	**Exam logistics and final mock**	P1: Timed full mock examination | P2: Exam rules, slips, timetable and venue brief
4	**BECE examinations begin**	P1: BECE papers start | P2: Quiet study space and support for candidates
5	**BECE examinations**	P1 and P2: Candidates sit papers; study space, past questions and counselling stay open
6	**BECE examinations conclude**	P1 and P2: Final papers; candidates hand in materials and wind down
7	**Post-BECE: portfolio building**	P1: Collect all JSS work into the portfolio | P2: Polish and organise it
8	**Python capstone**	P1: Plan and build the capstone | P2: Milestone check
9	**Website capstone**	P1: Build the site | P2: Publish on a free host
10	**AI capstone**	P1: Train and finish the model | P2: Demo day rehearsal
11	**Choosing SSS tracks**	P1: Sciences, tech, arts; where AI fits | P2: Track mapping workshop
12	**Careers and study skills**	P1: Meet practitioners or career videos | P2: SSS note-taking and resource practice
13	**Valedictory and farewell**	P1: Graduation and capstone showcase | P2: Farewell and next steps

SSS 1

First Term

Week	Topic	Subtopics (period 1 / period 2)
1	**Data representation**	P1: Binary, hexadecimal | P2: Convert numbers; encode text
2	**Problem solving**	P1: Steps and algorithms | P2: Write algorithms for three problems
3	**Python fundamentals**	P1: Data types, operators | P2: Exercise set one
4	**Control flow**	P1: if and loops | P2: Exercise set two
5	**Functions and structure**	P1: Parameters, reuse | P2: Refactor practice
6	**Spreadsheets for analysis**	P1: Formulas and charts | P2: Analyse a market dataset
7	**Data science process**	P1: Ask, get, clean, analyse, communicate | P2: Map a real question onto the process
8	**AI, ML and deep learning**	P1: How they differ | P2: Classify five systems into the right family
9	**AI in Nigerian industries**	P1: Banking, agriculture, health, transport | P2: One-page industry briefs
10	**Project and revision**	P1: Present mini projects | P2: Recap quiz
11	**Examinations**	End-of-term examination on the term's topics.
12	**Marking and computation**	Teachers mark scripts and compute continuous assessment and exam scores.
13	**Results and closing**	Results review, records update, school closes.

Second Term

Week	Topic	Subtopics (period 1 / period 2)
1	**Recap**	P1: Quiz on first term | P2: Team quiz
2	**Python collections**	P1: Lists and dictionaries | P2: Record-keeping program
3	**Files**	P1: Read and write data | P2: Save and load program data
4	**pandas introduction**	P1: Load and inspect data | P2: Explore a Nigerian open dataset
5	**Visualisation**	P1: Charts with matplotlib | P2: Chart three findings
6	**Statistics basics**	P1: Mean, median, spread | P2: Summarise the dataset
7	**Supervised learning idea**	P1: Training on labelled examples | P2: Label a small dataset in class
8	**First model**	P1: Simple classifier with scikit-learn | P2: Train, test and report accuracy
9	**Ethics: data rights**	P1: NDPR, consent | P2: Consent-form exercise
10	**Project and revision**	P1: Present the model | P2: Recap quiz
11	**Examinations**	End-of-term examination on the term's topics.
12	**Marking and computation**	Teachers mark scripts and compute continuous assessment and exam scores.
13	**Results and closing**	Results review, records update, school closes.

Third Term

Week	Topic	Subtopics (period 1 / period 2)
1	**Recap**	P1: Review of second term |

		P2: Quiz relay
2	**HTML and CSS**	P1: Build a styled page | P2: Style your portfolio page
3	**JavaScript basics**	P1: Interactivity | P2: Add a button and a counter
4	**Portfolio website**	P1: Build and host | P2: Deploy on a free host
5	**Cloud concepts**	P1: Storage, compute, free tiers | P2: Create a free-tier account
6	**SQL introduction**	P1: Select and filter | P2: Query a school database
7	**Databases and apps**	P1: Why apps need data | P2: Sketch an app's data model
8	**AI services demo**	P1: Cloud speech and vision APIs | P2: Test two services on local content
9	**Presentations**	P1: Communicate technical work | P2: Present the portfolio site
10	**Revision**	P1: Recap the year | P2: End-of-year quiz
11	**Examinations**	End-of-term examination on the term's topics.
12	**Marking and computation**	Teachers mark scripts and compute continuous assessment and exam scores.
13	**Results and closing**	Results review, records update, school closes.

SSS 2

First Term

Week	Topic	Subtopics (period 1 / period 2)
1	**Responsive web design**	P1: Mobile-first layouts | P2: Make a page fit any phone
2	**JavaScript DOM**	P1: Change pages with code | P2: Build an interactive form
3	**Frontend framework taste**	P1: React overview | P2: Read and edit a starter app
4	**Backend idea**	P1: Servers and requests | P2: Trace a request end to end
5	**Flask first app**	P1: Routes and templates | P2: Build a two-page app
6	**APIs**	P1: Consume a public API | P2: Fetch live data into your page
7	**Databases with Flask**	P1: Simple CRUD | P2: Build a notes app
8	**Nigerian tech ecosystem**	P1: Startups, hubs, internships | P2: Map three hubs and one internship path
9	**Project planning**	P1: Scope a real project | P2: Write the project brief
10	**Project and revision**	P1: Present the brief | P2: Recap quiz
11	**Examinations**	End-of-term examination on the term's topics.
12	**Marking and computation**	Teachers mark scripts and compute continuous assessment and exam scores.
13	**Results and closing**	Results review, records update, school closes.

Second Term

Week	Topic	Subtopics (period 1 / period 2)
1	**Recap**	P1: Quiz on first term | P2:

		Team quiz
2	**pandas deep dive**	P1: Grouping, merging | P2: Analyse two joined datasets
3	**Data cleaning practice**	P1: Real messy dataset | P2: Clean and document the fixes
4	**Exploratory analysis**	P1: Patterns and outliers | P2: Findings memo
5	**Visualisation storytelling**	P1: Charts that persuade | P2: Build a five-chart story
6	**Machine learning: regression**	P1: Predict numbers | P2: Predict market prices or exam scores
7	**Machine learning: classification**	P1: Predict categories | P2: Train and evaluate a classifier
8	**Model evaluation**	P1: Accuracy and errors | P2: Error analysis worksheet
9	**Cloud services**	P1: AWS or GCP free tier | P2: Deploy a small script or site
10	**Project and revision**	P1: Present the analysis | P2: Recap quiz
11	**Examinations**	End-of-term examination on the term's topics.
12	**Marking and computation**	Teachers mark scripts and compute continuous assessment and exam scores.
13	**Results and closing**	Results review, records update, school closes.

Third Term

Week	Topic	Subtopics (period 1 / period 2)
1	**Recap**	P1: Review of second term | P2: Quiz relay
2	**NLP basics**	P1: Text to data; simple sentiment | P2: Analyse NairaLand-style comments
3	**Computer vision basics**	P1: Images to data | P2:

		Classify local food images
4	**Chatbot build**	P1: Simple bot with Python | P2: Build a school FAQ bot
5	**Ethics and law**	P1: NDPR, privacy, fairness | P2: Compliance checklist exercise
6	**AI tools for productivity**	P1: Learning faster, honestly | P2: Set usage rules for coursework
7	**Entrepreneurship**	P1: Freelancing with tech skills | P2: Draft a service profile
8	**Capstone planning**	P1: Choose and scope | P2: Capstone brief
9	**Capstone work**	P1: Build | P2: Milestone check
10	**Project and revision**	P1: Present progress | P2: Recap the year
11	**Examinations**	End-of-term examination on the term's topics.
12	**Marking and computation**	Teachers mark scripts and compute continuous assessment and exam scores.
13	**Results and closing**	Results review, records update, school closes.

SSS 3

First Term

Week	Topic	Subtopics (period 1 / period 2)
1	**Syllabus mapping**	P1: WAEC and NECO topics audit | P2: Build a personal gap list
2	**Advanced Python**	P1: OOP basics | P2: Model a school as classes
3	**Capstone selection**	P1: Choose the project | P2: Approve the capstone brief
4	**ML project cycle**	P1: Full walkthrough | P2: Map the capstone onto the cycle
5	**Data storytelling**	P1: Report writing | P2: Write the capstone report skeleton
6	**Revision: data topics**	P1: Past questions | P2: Timed drill one
7	**Revision: programming**	P1: Past questions | P2: Timed drill two
8	**Revision: web**	P1: Past questions | P2: Timed drill three
9	**Mock practical**	P1: Timed exercise | P2: Run and score it
10	**Feedback and revision plan**	P1: Set the term's plan | P2: Write the plan
11	**Examinations**	End-of-term examination on the term's topics.
12	**Marking and computation**	Teachers mark scripts and compute continuous assessment and exam scores.
13	**Results and closing**	Results review, records update, school closes.

Second Term

Week	Topic	Subtopics (period 1 / period 2)
1	**Capstone build one**	P1: Data or model | P2:

		Milestone one
2	**Capstone build two**	P1: Features and pages | P2: Milestone two
3	**Capstone testing**	P1: Fix bugs | P2: Test log
4	**Documentation**	P1: README and slides | P2: Draft both
5	**Deployment**	P1: Host the work | P2: Go live
6	**Presentation practice**	P1: Rehearse | P2: Peer review
7	**Revision: core overlaps**	P1: Maths and English tie-ins | P2: Cross-subject drill
8	**Mock exams**	P1: Practice | P2: Sit the mock
9	**Review mocks**	P1: Target weak areas | P2: Update the gap list
10	**Final revision**	P1: Polish | P2: Full revision pass
11	**Examinations**	End-of-term examination on the term's topics.
12	**Marking and computation**	Teachers mark scripts and compute continuous assessment and exam scores.
13	**Results and closing**	Results review, records update, school closes.

Third Term

Week	Topic	Subtopics (period 1 / period 2)
1	**Final revision clinic one**	P1: Drills on the personal syllabus gap list | P2: Past questions, objectives
2	**Final revision clinic two**	P1: Theory and essay practice with marking guides | P2: Practical preparation in the computer lab
3	**Exam logistics and final mock**	P1: Timed full mock examination | P2: Exam rules, exam slip, timetable and venue

		brief
4	**External examinations begin**	P1: WAEC, NECO or NABTEB papers start | P2: Quiet study space and support for candidates
5	**External examinations**	P1 and P2: Candidates sit papers; the school keeps study space, past questions and counselling open
6	**External examinations**	P1 and P2: Candidates sit papers; non-candidate classes continue their normal scheme
7	**External examinations**	P1 and P2: Candidates sit papers; teachers run revision clinics for weaker papers
8	**External examinations conclude**	P1 and P2: Final papers; candidates hand in materials and wind down
9	**Post-exam debrief**	P1: Review how each paper went | P2: Update the gap list for resits or next steps
10	**Capstone showcase**	P1: Present final projects to a panel | P2: Sign off digital portfolios
11	**Next steps clinic**	P1: JAMB, admissions and scholarship applications | P2: Certifications to begin (Google, AWS, free tiers)
12	**Graduation rehearsal**	P1: Valedictory preparation and awards | P2: Records and portfolio handover
13	**Valedictory and farewell**	P1: Graduation ceremony | P2: Farewell and alumni network sign-up
