## AI EDUCATION CURRICULUM

Comprehensive Teacher's Lesson Note

# Digital Citizenship

### Primary 1 · Third Term · Week 6

| Field | Detail |
|---|---|
| Subject | AI Education and Digital Skills |
| Academic session | 2026/2027 |
| Duration | 2 periods (35 to 40 minutes each, subject to the school timetable) |
| Document type | Comprehensive Teacher's Lesson Note |
| Curriculum status | Proposed curriculum for school pilot, review and consultation |
| Prepared by | Rehoteq Technologies (rehoteq.com) |
| Edition | First edition, October 2026 |

PROPOSED CURRICULUM NOTICE: This lesson note expands the Rehoteq AI Education Curriculum's proposed Primary 1, Third Term, Week 6 scheme of work. It is offered for school pilot, review and consultation. It is not represented as an officially approved national syllabus, and it does not replace the current NERDC curriculum or any examination-board requirement.

# 1. Lesson Information

| Field | Detail |
|---|---|
| Class | PRIMARY 1 |
| Subject | AI Education and Digital Skills |
| Term | Third Term |
| Week | Week 6 of Third Term |
| Topic | Digital Citizenship |
| Duration | 2 periods (35 to 40 minutes each) |

# 2. Learning Outcome

Learners can explain or demonstrate the key idea in 'Digital Citizenship' and apply it to a guided example.

# 3. Weekly Scheme Content

| Period | Scheme content |
|---|---|
| Period 1 | Kind words; asking before using a device |
| Period 2 | Respond to simple classroom scenarios |
| Weeks 11 to 13 of the term are reserved for examinations, marking and results. Do not introduce new content during those weeks. | |

# 4. Materials and Preparation

- Prepare simple locally available objects, picture cards or board drawings that illustrate the topic.
- Paper and pencils for recording. Use a shared device or offline demonstration only if available and appropriate. Prepare an equivalent no-device activity.

Low-resource option: The teacher can use ordinary classroom objects, hand-drawn cards and spoken instructions. No special equipment, electricity or internet is required.

# 5. Period One: Introduce and Model

- Starter: connect “Digital Citizenship” to learners’ home, school or community experiences. Ask 2–3 short questions and accept examples in familiar Nigerian contexts.
- Explain and model the first part of the scheme content: Period 1: Kind words; asking before using a device Period 2: Respond to simple classroom scenarios. Use concrete examples, a drawing, a short demonstration or a think-aloud. Introduce key words and check understanding as you go.
- Guided practice: demonstrate one example, then invite learners to try a similar example with a partner or as a whole class. Correct misconceptions kindly and ask learners to explain how they reached an answer.

# 6. Lesson Pictures

The illustrations below are original Rehoteq sample pictures for this lesson. Each carries a text caption, and important information does not depend on colour alone. Teachers can show them on a screen, print them, or describe them on the board.

*Picture 1. Ask first: the pupil raises her hand to take her turn with the shared tablet, and her classmate waits politely.*

*Picture 2. Keep it private: the pupil holds the tablet close and does not share other people's pictures or words.*

*Picture 3. Be kind: partners take turns and say kind words to each other while they use the tablet together.*

*Picture 4. Our rules: the teacher explains the class rules for using devices kindly and safely.*

## 7. Period Two: Practise and Apply

- Quick review: ask learners to recall the main idea from Period 1 using a question, object, picture or oral explanation.
- Application: learners complete a short sorting, matching, sequencing, drawing, role-play, discussion or practical task that directly reflects the weekly topic. Ask pairs/groups to share their reasoning.
- Consolidate: revisit the learning outcome, address common errors and have each learner show or say one thing learned. Keep the activity low-cost and offline-ready.

## 8. Assessment and Evidence

- Scheme evidence: Oral/written check, practical task or short exit ticket.

Ask learners to define or identify one key idea, complete one practical example, and explain their choice in a sentence or orally. Record observations for learners needing reteaching.

## 9. Suggested Questions and Answer Guidance

1. What is one important idea in “Digital Citizenship”? Expected response: an age-appropriate explanation or correct example drawn from the taught content.

2. Show or describe one example. Expected response: learner correctly identifies, demonstrates or applies the idea with no more prompting than appropriate for their level.

3. How can you use this safely or helpfully at home or school? Expected response: a relevant practical example that follows school and family safety rules.

## 10. Home Activity

Ask a family member to help the learner find or describe one everyday example related to “Digital Citizenship”. The learner may draw it or explain it orally in class. Do not require internet access, a personal device, photographs or paid materials.

## 11. Inclusion

Offer picture/object choices, peer support, oral responses, extra processing time and a simpler worked example; extend learners who are ready by asking them to create and explain a new example.

## 12. Safety and Privacy

Supervise all equipment; do not ask learners to share personal data or upload identifiable images; follow school rules for devices and online tools. Use paper-based alternatives by default when uncertain.

## 13. Teacher Reflection

(1) learners who met the outcome, (2) the misconception that appeared most often, and (3) one adjustment for the next lesson.

**Reflection notes**

_____

## 14. Curriculum Alignment and Document Status

Source note: The weekly topic, outcome, period allocations and assessment evidence in this note are drawn from the Rehoteq AI Education Curriculum Weekly Schemes of Work for Primary 1 to 6, Session 2026/2027. The lesson procedures are suggested teacher-support material, not verbatim official curriculum. This note does not replace checking the current official NERDC curriculum or the school's approved assessment requirements. Keep the 'proposed curriculum' label until formal approval and alignment are confirmed.
