AI EDUCATION CURRICULUM

Comprehensive Teacher's Lesson Note

Step-by-Step Routines

Primary 1 · Third Term · Week 2

Field	Detail
Subject	AI Education and Digital Skills
Academic session	2026/2027
Duration	2 periods (35 to 40 minutes each, subject to the school timetable)
Document type	Comprehensive Teacher's Lesson Note
Curriculum status	Proposed curriculum for school pilot, review and consultation
Prepared by	Rehoteq Technologies (rehoteq.com)
Edition	First edition, October 2026

PROPOSED CURRICULUM NOTICE: This lesson note expands the Rehoteq AI Education Curriculum's proposed Primary 1, Third Term, Week 2 scheme of work. It is offered for school pilot, review and consultation. It is not represented as an officially approved national syllabus, and it does not replace the current NERDC curriculum or any examination-board requirement.

1. Lesson Information

Field	Detail
Class	PRIMARY 1
Subject	AI Education and Digital Skills
Term	Third Term
Week	Week 2 of Third Term
Topic	Step-by-Step Routines
Duration	2 periods (35 to 40 minutes each)

2. Learning Outcome

Learners can explain or demonstrate the key idea in 'Step-by-Step Routines' and apply it to a guided example.

3. Weekly Scheme Content

Period	Scheme content
Period 1	Steps for washing hands; steps for packing a bag
Period 2	Put routine cards in order
Weeks 11 to 13 of the term are reserved for examinations, marking and results. Do not introduce new content during those weeks.	

4. Materials and Preparation

- Prepare simple locally available objects, picture cards or board drawings that illustrate the topic.
- Paper and pencils for recording. Use a shared device or offline demonstration only if available and appropriate. Prepare an equivalent no-device activity.

Low-resource option: The teacher can use ordinary classroom objects, hand-drawn cards and spoken instructions. No special equipment, electricity or internet is required.

5. Period One: Introduce and Model

- Starter: connect “Step-by-Step Routines” to learners’ home, school or community experiences. Ask 2–3 short questions and accept examples in familiar Nigerian contexts.
- Explain and model the first part of the scheme content: Period 1: Steps for washing hands; steps for packing a bag Period 2: Put routine cards in order. Use concrete examples, a drawing, a short demonstration or a think-aloud. Introduce key words and check understanding as you go.
- Guided practice: demonstrate one example, then invite learners to try a similar example with a partner or as a whole class. Correct misconceptions kindly and ask learners to explain how they reached an answer.

6. Lesson Pictures

The illustrations below are original Rehoteq sample pictures for this lesson. Each carries a text caption, and important information does not depend on colour alone. Teachers can show them on a screen, print them, or describe them on the board.

Picture 1. Morning routine: the pupil hangs her bag on the hook and stacks her books in order, one step at a time.

Picture 2. Step by step: the pupil follows each step card and packs his blocks into the box, one step before the next.

Picture 3. Take turns: one pupil washes her hands while her partner waits patiently for her turn.

Picture 4. Model it: the teacher shows the tidy-up routine step by step and the class copies each step.

7. Period Two: Practise and Apply

- Quick review: ask learners to recall the main idea from Period 1 using a question, object, picture or oral explanation.
- Application: learners complete a short sorting, matching, sequencing, drawing, role-play, discussion or practical task that directly reflects the weekly topic. Ask pairs/groups to share their reasoning.
- Consolidate: revisit the learning outcome, address common errors and have each learner show or say one thing learned. Keep the activity low-cost and offline-ready.

8. Assessment and Evidence

- Scheme evidence: Oral/written check, practical task or short exit ticket.

Ask learners to define or identify one key idea, complete one practical example, and explain their choice in a sentence or orally. Record observations for learners needing reteaching.

9. Suggested Questions and Answer Guidance

1. What is one important idea in “Step-by-Step Routines”? Expected response: an age-appropriate explanation or correct example drawn from the taught content.

2. Show or describe one example. Expected response: learner correctly identifies, demonstrates or applies the idea with no more prompting than appropriate for their level.

3. How can you use this safely or helpfully at home or school? Expected response: a relevant practical example that follows school and family safety rules.

10. Home Activity

Ask a family member to help the learner find or describe one everyday example related to “Step-by-Step Routines”. The learner may draw it or explain it orally in class. Do not require internet access, a personal device, photographs or paid materials.

11. Inclusion

Offer picture/object choices, peer support, oral responses, extra processing time and a simpler worked example; extend learners who are ready by asking them to create and explain a new example.

12. Safety and Privacy

Supervise all equipment; do not ask learners to share personal data or upload identifiable images; follow school rules for devices and online tools. Use paper-based alternatives by default when uncertain.

13. Teacher Reflection

(1) learners who met the outcome, (2) the misconception that appeared most often, and (3) one adjustment for the next lesson.

Reflection notes

_____

14. Curriculum Alignment and Document Status

Source note: The weekly topic, outcome, period allocations and assessment evidence in this note are drawn from the Rehoteq AI Education Curriculum Weekly Schemes of Work for Primary 1 to 6, Session 2026/2027. The lesson procedures are suggested teacher-support material, not verbatim official curriculum. This note does not replace checking the current official NERDC curriculum or the school's approved assessment requirements. Keep the 'proposed curriculum' label until formal approval and alignment are confirmed.
