REHOTEQ AI EDUCATION CURRICULUM

Weekly Schemes of Work | Primary 1–6, JSS 1–3 and SSS 1–3

Proposed Curriculum — For School Pilot, Review and Consultation | Session 2026/2027

1. Purpose and status

This document converts the Rehoteq AI curriculum framework and the uploaded Rehoteq AI Curriculum: Secondary (JSS 1 to SSS 3), Edition 2.0, into a weekly scheme of work. It is a proposed Rehoteq curriculum, not a claim of national subject approval. Primary schemes are proposed age-appropriate extensions of the master framework; secondary schemes retain source topic titles and terminology where available, with period allocations adjusted to the confirmed timetable.

2. Confirmed timetable and term structure

Level	Periods per week	Teaching periods in Weeks 1–10
Primary 1	2	20
Primary 2	2	20
Primary 3	2	20
Primary 4	2	20
Primary 5	2	20
Primary 6	2	20
JSS 1	2	20
JSS 2	2	20
JSS 3	2	20
SSS 1	3	30
SSS 2	3	30
SSS 3	3	30

Weeks 1–10 are the curriculum delivery window. Week 10 includes project completion, revision and/or continuous assessment; no new topic should be left dependent on Weeks 11–13. Week 11 is for examinations. Week 12 is for marking and score computation. Week 13 is for result review, record updates, closure and administrative completion. Schools should adjust the dates to their approved calendar while preserving this planning principle.

SSS 3 and JSS 3 may face WAEC/NECO/NABTEB or BECE timetable requirements that differ from ordinary school examinations. The school must reconcile those external dates with the calendar; this document does not override examination-board instructions.

3. How to read the weekly scheme

Each weekly entry gives a topic, period-by-period subtopics/activities, a learning outcome and an assessment or evidence of learning. For Primary 1–6 and JSS 1–3, Period 1 introduces the concept and Period 2 provides guided practice or application. For SSS 1–3, Period 1 introduces the concept, Period 2 develops the method, and Period 3 is for guided practical work, analysis, testing or documentation. Where devices or internet are unavailable, use unplugged, paper-based, shared-device or teacher-demonstration alternatives.

4. Term-wide assessment guidance

Use a balanced mix of oral questioning, short written exercises, practical demonstrations, notebooks/portfolios, project rubrics and supervised quizzes. Use the school's approved weighting policy rather than assuming a nationally mandated AI-subject weighting. Avoid collecting identifiable pupil data or uploading pupil images, names, marks, contact details or other personal information to public AI tools.

Primary 1 — Term 1

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Getting to Know Technology	Period 1: Meaning of technology; familiar tools Period 2: Identify everyday tools; sort tools by use	Learners can explain or demonstrate the key idea in 'Getting to Know Technology' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Smart and Ordinary Devices	Period 1: Examples of smart devices; ordinary devices Period 2: Compare devices; discuss what each helps people do	Learners can explain or demonstrate the key idea in 'Smart and Ordinary Devices' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Following Instructions	Period 1: Meaning of an instruction; one-step instructions Period 2: Follow and give clear instructions	Learners can explain or demonstrate the key idea in 'Following Instructions' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Patterns Around Us	Period 1: Repeating colours and shapes; finding the next item Period 2: Complete pattern cards; explain the rule	Learners can explain or demonstrate the key idea in 'Patterns Around Us' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	People and Machines	Period 1: Things people do; things machines can do Period 2: Sort tasks into people, machines, or both	Learners can explain or demonstrate the key idea in 'People and Machines' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Computer Parts Around Us	Period 1: Screen, keyboard, mouse, speakers Period 2: Name parts using pictures; match part to function	Learners can explain or demonstrate the key idea in 'Computer Parts Around Us' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Using Devices Carefully	Period 1: Clean hands; careful handling; safe posture Period 2: Demonstrate device-care routines	Learners can explain or demonstrate the key idea in 'Using Devices Carefully' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Privacy Basics	Period 1: Personal information; trusted adults Period 2: Identify information not to share; practise asking for help	Learners can explain or demonstrate the key idea in 'Privacy Basics' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Simple Digital Drawing	Period 1: Lines and shapes; colour and erase tools Period 2: Create a picture with a teacher-guided tool or paper alternative	Learners can explain or demonstrate the key idea in 'Simple Digital Drawing' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Show and Review	Period 1: Choose one class activity; explain what was learned Period 2: Present a drawing or instruction sequence; oral review	Learners can explain or demonstrate the key idea in 'Show and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
		closure and programme feedback.		

Primary 1 — Term 2

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Review and Device Rules	Period 1: Recall device names; safe-use rules Period 2: Picture quiz; demonstrate one safety rule	Learners can explain or demonstrate the key idea in 'Review and Device Rules' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Input and Output	Period 1: Giving a device information; receiving a result Period 2: Act out input/output with classroom examples	Learners can explain or demonstrate the key idea in 'Input and Output' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Sorting Objects	Period 1: Sort by colour; sort by shape Period 2: Sort a mixed set and explain the chosen rule	Learners can explain or demonstrate the key idea in 'Sorting Objects' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Making Clear Choices	Period 1: Yes/no questions; simple choices Period 2: Answer rule-based questions; create a two-choice game	Learners can explain or demonstrate the key idea in 'Making Clear Choices' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Sounds and Images	Period 1: Devices that record sound; devices that show images Period 2: Match examples to purpose	Learners can explain or demonstrate the key idea in 'Sounds and Images' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Digital Stories	Period 1: Beginning, middle and end; picture sequence Period 2: Arrange story cards; tell a short digital-themed story	Learners can explain or demonstrate the key idea in 'Digital Stories' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Counting and Tallying	Period 1: Count classroom objects; make tally marks Period 2: Record a small class count with teacher support	Learners can explain or demonstrate the key idea in 'Counting and Tallying' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	When a Device Makes Mistakes	Period 1: Wrong input; unclear instruction Period 2: Spot a mistake in a simple sequence; suggest a fix	Learners can explain or demonstrate the key idea in 'When a Device Makes Mistakes' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Our Helpful Smart Device	Period 1: Choose a community need; draw a helpful device Period 2: Draw and label a device idea	Learners can explain or demonstrate the key idea in 'Our Helpful Smart Device' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Project and Review	Period 1: Prepare a picture or sorting demonstration; practise explanation Period 2: Present work; review key terms	Learners can explain or demonstrate the key idea in 'Project and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Primary 1 — Term 3

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Review of the Year	Period 1: Recall patterns, instructions and safety Period 2: Oral quiz; sorting challenge	Learners can explain or demonstrate the key idea in 'Review of the Year' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Step-by-Step Routines	Period 1: Steps for washing hands; steps for packing a bag Period 2: Put routine cards in order	Learners can explain or demonstrate the key idea in 'Step-by-Step Routines' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Decision Rules	Period 1: If it rains; if the light is red Period 2: Match a condition to an action	Learners can explain or demonstrate the key idea in 'Decision Rules' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Data in Pictures	Period 1: Picture counts; comparing groups Period 2: Answer questions from a simple picture chart	Learners can explain or demonstrate the key idea in 'Data in Pictures' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Technology in the Community	Period 1: School; market; hospital and farm examples Period 2: Match a device to a job	Learners can explain or demonstrate the key idea in 'Technology in the Community' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Digital Citizenship	Period 1: Kind words; asking before using a device Period 2: Respond to simple classroom scenarios	Learners can explain or demonstrate the key idea in 'Digital Citizenship' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Creating a Pattern Game	Period 1: Choose shapes; define repeat rule Period 2: Create and test a pattern game	Learners can explain or demonstrate the key idea in 'Creating a Pattern Game' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Teamwork	Period 1: Taking turns; sharing materials Period 2: Complete a group activity with assigned roles	Learners can explain or demonstrate the key idea in 'Teamwork' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	My Technology Poster	Period 1: Plan message; draw and label Period 2: Finish a poster about safe and helpful technology	Learners can explain or demonstrate the key idea in 'My Technology Poster' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Portfolio and Review	Period 1: Select best work; practise explaining it Period 2: Showcase work; end-of-year recap	Learners can explain or demonstrate the key idea in 'Portfolio and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Primary 2 — Term 1

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Technology at Home and School	Period 1: Common devices; their uses Period 2: Group device pictures by purpose	Learners can explain or demonstrate the key idea in 'Technology at Home and School' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Computer Parts and Care	Period 1: Input and output parts; safe handling Period 2: Match parts to functions; demonstrate care	Learners can explain or demonstrate the key idea in 'Computer Parts and Care' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Instructions and Sequences	Period 1: First, next, last; ordering steps Period 2: Sequence a familiar task	Learners can explain or demonstrate the key idea in 'Instructions and Sequences' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Patterns and Repetition	Period 1: Repeating patterns; missing item Period 2: Complete and create patterns	Learners can explain or demonstrate the key idea in 'Patterns and Repetition' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Input and Output	Period 1: Keyboard/mouse as input; screen/speaker as output Period 2: Role-play a device responding to input	Learners can explain or demonstrate the key idea in 'Input and Output' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	People, Computers and AI	Period 1: People make decisions; computers follow instructions Period 2: Sort examples and explain choices	Learners can explain or demonstrate the key idea in 'People, Computers and AI' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Privacy and Password Awareness	Period 1: Private information; strong secret phrases with adult guidance Period 2: Practise safe choices without sharing real passwords	Learners can explain or demonstrate the key idea in 'Privacy and Password Awareness' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Sorting and Classification	Period 1: Sort by one feature; sort by two features Period 2: Sort classroom objects and state rule	Learners can explain or demonstrate the key idea in 'Sorting and Classification' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Picture-Based Digital Work	Period 1: Use shapes and text; save with teacher help Period 2: Create a labelled picture or offline equivalent	Learners can explain or demonstrate the key idea in 'Picture-Based Digital Work' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Project and Review	Period 1: Plan a technology poster; explain choices Period 2: Present poster; review	Learners can explain or demonstrate the key idea in 'Project and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Primary 2 — Term 2

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Review and Digital Safety	Period 1: Recall device functions; safe-use rules Period 2: Quiz and safety scenario	Learners can explain or demonstrate the key idea in 'Review and Digital Safety' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Data We Can Count	Period 1: Questions; tally marks; tables Period 2: Collect non-personal class data	Learners can explain or demonstrate the key idea in 'Data We Can Count' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Reading Simple Charts	Period 1: Picture charts; bar charts Period 2: Answer questions from a class chart	Learners can explain or demonstrate the key idea in 'Reading Simple Charts' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Decision Trees	Period 1: Yes/no questions; branches Period 2: Build a paper decision tree	Learners can explain or demonstrate the key idea in 'Decision Trees' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	AI Examples Around Us	Period 1: Voice assistants; recommendations; cameras Period 2: Identify possible AI uses with teacher guidance	Learners can explain or demonstrate the key idea in 'AI Examples Around Us' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Rules and Classification	Period 1: Category labels; simple rules Period 2: Classify cards using a stated rule	Learners can explain or demonstrate the key idea in 'Rules and Classification' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Debugging Instructions	Period 1: Find a missing or incorrect step; correct sequence Period 2: Repair a mixed-up instruction card	Learners can explain or demonstrate the key idea in 'Debugging Instructions' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Digital Story Design	Period 1: Characters; scenes; sequence Period 2: Create a three-scene story	Learners can explain or demonstrate the key idea in 'Digital Story Design' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Technology and Inclusion	Period 1: Technology helps different users; accessibility examples Period 2: Suggest a helpful adaptation	Learners can explain or demonstrate the key idea in 'Technology and Inclusion' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Project and Review	Period 1: Present chart or decision tree; recap Period 2: Share work and complete assessment	Learners can explain or demonstrate the key idea in 'Project and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Primary 2 — Term 3

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Year Review	Period 1: Devices, data and safety Period 2: Mixed recall game	Learners can explain or demonstrate the key idea in 'Year Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Algorithms in Daily Life	Period 1: Recipe steps; classroom routines Period 2: Write or draw an ordered algorithm	Learners can explain or demonstrate the key idea in 'Algorithms in Daily Life' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Loops in Patterns	Period 1: Repeat a movement; repeat a shape Period 2: Create a repeating sequence	Learners can explain or demonstrate the key idea in 'Loops in Patterns' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Simple Conditions	Period 1: If/then rules; predict outcomes Period 2: Play a condition-based game	Learners can explain or demonstrate the key idea in 'Simple Conditions' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	AI Learns from Examples: First Idea	Period 1: Examples; categories; predictions Period 2: Use picture cards to make predictions	Learners can explain or demonstrate the key idea in 'AI Learns from Examples: First Idea' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	When Predictions Are Wrong	Period 1: Unclear examples; mistakes Period 2: Find and discuss misclassified cards	Learners can explain or demonstrate the key idea in 'When Predictions Are Wrong' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Data and Fairness	Period 1: Include different examples; avoid unfair rules Period 2: Discuss a simple fairness scenario	Learners can explain or demonstrate the key idea in 'Data and Fairness' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Planning a Helpful Tool	Period 1: User need; tool idea Period 2: Draw a tool and explain its purpose	Learners can explain or demonstrate the key idea in 'Planning a Helpful Tool' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Poster and Demonstration	Period 1: Prepare message; practise demonstration Period 2: Present work	Learners can explain or demonstrate the key idea in 'Poster and Demonstration' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Portfolio and Review	Period 1: Choose work; explain learning Period 2: End-of-year recap	Learners can explain or demonstrate the key idea in 'Portfolio and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Primary 3 — Term 1

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Computers in Nigerian Communities	Period 1: School, bank, hospital, farm examples Period 2: Match computer use to community need	Learners can explain or demonstrate the key idea in 'Computers in Nigerian Communities' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Hardware and Software	Period 1: Physical parts; programs and apps Period 2: Sort examples into hardware/software	Learners can explain or demonstrate the key idea in 'Hardware and Software' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Operating a Device Safely	Period 1: Start/close with guidance; handling rules Period 2: Demonstrate safe routines	Learners can explain or demonstrate the key idea in 'Operating a Device Safely' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Files and Digital Work	Period 1: Names; folders as containers; saving with guidance Period 2: Organise sample work into labelled folders	Learners can explain or demonstrate the key idea in 'Files and Digital Work' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Data and Information	Period 1: Raw facts; useful information Period 2: Turn simple counts into a statement	Learners can explain or demonstrate the key idea in 'Data and Information' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Rules and Algorithms	Period 1: Clear instructions; order matters Period 2: Write/draw steps for a familiar task	Learners can explain or demonstrate the key idea in 'Rules and Algorithms' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	AI in Everyday Life	Period 1: Recognition; recommendations; translation Period 2: Identify likely AI examples and limitations	Learners can explain or demonstrate the key idea in 'AI in Everyday Life' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Classification Rules	Period 1: Labels; one-feature and two-feature sorting Period 2: Create and test a classification rule	Learners can explain or demonstrate the key idea in 'Classification Rules' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Privacy and Online Kindness	Period 1: Personal data; respectful communication Period 2: Respond to safety scenarios	Learners can explain or demonstrate the key idea in 'Privacy and Online Kindness' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Class Survey Project	Period 1: Choose a non-sensitive question; tally and report Period 2: Present results and review	Learners can explain or demonstrate the key idea in 'Class Survey Project' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Primary 3 — Term 2

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Review and Data Types	Period 1: Numbers; categories; pictures Period 2: Sort example data	Learners can explain or demonstrate the key idea in 'Review and Data Types' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Tables and Spreadsheets	Period 1: Rows; columns; cells Period 2: Enter sample counts into a paper or digital table	Learners can explain or demonstrate the key idea in 'Tables and Spreadsheets' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Charts and Patterns	Period 1: Bar charts; comparisons Period 2: Make a chart from class data	Learners can explain or demonstrate the key idea in 'Charts and Patterns' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Block Coding Introduction	Period 1: Sprites; events; blocks Period 2: Create a simple movement sequence	Learners can explain or demonstrate the key idea in 'Block Coding Introduction' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Sequences and Events	Period 1: Order; start event Period 2: Build a short animation	Learners can explain or demonstrate the key idea in 'Sequences and Events' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Loops and Repetition	Period 1: Repeat block; pattern Period 2: Make a sprite repeat an action	Learners can explain or demonstrate the key idea in 'Loops and Repetition' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Conditions and Choices	Period 1: If/then; choices Period 2: Create a simple branching story	Learners can explain or demonstrate the key idea in 'Conditions and Choices' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Testing and Debugging	Period 1: Expected result; error; fix Period 2: Find and fix a sequence error	Learners can explain or demonstrate the key idea in 'Testing and Debugging' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	AI and Example Data	Period 1: Training examples; labels Period 2: Sort labelled picture cards and test predictions	Learners can explain or demonstrate the key idea in 'AI and Example Data' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Project and Review	Period 1: Combine coding and data; presentation Period 2: Show project; assess understanding	Learners can explain or demonstrate the key idea in 'Project and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Primary 3 — Term 3

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Year Review	Period 1: Data, coding, privacy and AI Period 2: Mixed quiz	Learners can explain or demonstrate the key idea in 'Year Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Digital Research Skills	Period 1: Search terms; reliable sources Period 2: Compare two age-appropriate information sources	Learners can explain or demonstrate the key idea in 'Digital Research Skills' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Algorithms and Flowcharts	Period 1: Start/step/decision/end; symbols Period 2: Draw a flowchart for a school routine	Learners can explain or demonstrate the key idea in 'Algorithms and Flowcharts' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Pseudocode	Period 1: Plain-language steps; indentation as order Period 2: Convert a flowchart into pseudocode	Learners can explain or demonstrate the key idea in 'Pseudocode' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	AI Strengths and Limits	Period 1: Useful tasks; errors and uncertainty Period 2: Compare human and machine decisions	Learners can explain or demonstrate the key idea in 'AI Strengths and Limits' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Misinformation Basics	Period 1: Claim; evidence; source Period 2: Check a simple claim using a trusted source	Learners can explain or demonstrate the key idea in 'Misinformation Basics' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Fairness and Inclusion	Period 1: Different users; biased examples Period 2: Improve a small example set	Learners can explain or demonstrate the key idea in 'Fairness and Inclusion' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Plan a Community Solution	Period 1: Identify problem; intended user Period 2: Sketch a solution and success criteria	Learners can explain or demonstrate the key idea in 'Plan a Community Solution' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Project Build and Test	Period 1: Create poster, animation or paper prototype; test Period 2: Collect feedback and improve	Learners can explain or demonstrate the key idea in 'Project Build and Test' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Showcase and Review	Period 1: Explain choices; reflect Period 2: Present project and complete recap	Learners can explain or demonstrate the key idea in 'Showcase and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Primary 4 — Term 1

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Digital Systems and Society	Period 1: Hardware/software; Nigerian uses Period 2: Map devices to tasks	Learners can explain or demonstrate the key idea in 'Digital Systems and Society' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Files, Folders and Productivity	Period 1: Naming files; folder structure Period 2: Organise a sample project folder	Learners can explain or demonstrate the key idea in 'Files, Folders and Productivity' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Internet and Search	Period 1: Browser basics; search terms Period 2: Find teacher-approved information	Learners can explain or demonstrate the key idea in 'Internet and Search' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Data and Tables	Period 1: Variables; rows and columns Period 2: Collect and organise non-sensitive data	Learners can explain or demonstrate the key idea in 'Data and Tables' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Patterns and Classification	Period 1: Features; labels; decision rules Period 2: Classify local objects using a rule	Learners can explain or demonstrate the key idea in 'Patterns and Classification' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Introduction to AI	Period 1: Definition; AI vs ordinary automation Period 2: Identify AI examples and non-examples	Learners can explain or demonstrate the key idea in 'Introduction to AI' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	AI in Nigerian Life	Period 1: POS/fraud alerts; traffic; agriculture Period 2: Match AI application to problem and risk	Learners can explain or demonstrate the key idea in 'AI in Nigerian Life' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Block Coding	Period 1: Sprites; events; sequences Period 2: Create a short interactive scene	Learners can explain or demonstrate the key idea in 'Block Coding' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Loops and Conditions	Period 1: Repeat; if/then Period 2: Build a decision-based animation	Learners can explain or demonstrate the key idea in 'Loops and Conditions' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Mini-project and Review	Period 1: Choose project; test and present Period 2: Demonstrate project and recap	Learners can explain or demonstrate the key idea in 'Mini-project and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Primary 4 — Term 2

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Review and Data Quality	Period 1: Accuracy; completeness; consistency Period 2: Spot errors in a sample table	Learners can explain or demonstrate the key idea in 'Review and Data Quality' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Spreadsheets	Period 1: Cells; formulas; sorting Period 2: Calculate totals from sample survey	Learners can explain or demonstrate the key idea in 'Spreadsheets' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Charts and Interpretation	Period 1: Bar/line/pie charts; fair scales Period 2: Create chart and state two findings	Learners can explain or demonstrate the key idea in 'Charts and Interpretation' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Algorithms and Flowcharts	Period 1: Sequence; decision; symbols Period 2: Flowchart a familiar process	Learners can explain or demonstrate the key idea in 'Algorithms and Flowcharts' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Scratch Variables	Period 1: Values; counters; score Period 2: Add score or counter to a project	Learners can explain or demonstrate the key idea in 'Scratch Variables' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Debugging	Period 1: Test cases; errors; revision Period 2: Fix a broken program	Learners can explain or demonstrate the key idea in 'Debugging' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Machine Learning Idea	Period 1: Examples vs rules; training examples Period 2: Use labelled cards to simulate a classifier	Learners can explain or demonstrate the key idea in 'Machine Learning Idea' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Training and Testing	Period 1: Training examples; new examples Period 2: Test the rule on unseen cards	Learners can explain or demonstrate the key idea in 'Training and Testing' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	AI Ethics and Privacy	Period 1: Consent; bias; data protection Period 2: Review a classroom scenario	Learners can explain or demonstrate the key idea in 'AI Ethics and Privacy' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Project and Review	Period 1: Combine data and code; presentation Period 2: Present and self-assess	Learners can explain or demonstrate the key idea in 'Project and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Primary 4 — Term 3

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Year Review	Period 1: Coding, data and AI Period 2: Quick challenge	Learners can explain or demonstrate the key idea in 'Year Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Web and Digital Content	Period 1: Web page purpose; headings and images Period 2: Plan a simple information page	Learners can explain or demonstrate the key idea in 'Web and Digital Content' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Algorithms and Pseudocode	Period 1: Stepwise logic; clear instructions Period 2: Write pseudocode for a quiz	Learners can explain or demonstrate the key idea in 'Algorithms and Pseudocode' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	AI Output Verification	Period 1: Check claims; compare sources Period 2: Verify a generated or supplied answer with teacher guidance	Learners can explain or demonstrate the key idea in 'AI Output Verification' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Misinformation and Deepfakes	Period 1: Edited media; warning signs Period 2: Analyse age-appropriate examples	Learners can explain or demonstrate the key idea in 'Misinformation and Deepfakes' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Responsible Prompting	Period 1: Clear requests; context; checking outputs Period 2: Improve a prompt and evaluate result	Learners can explain or demonstrate the key idea in 'Responsible Prompting' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	AI and Accessibility	Period 1: Captions; translation; assistive tools Period 2: Propose an inclusive use case	Learners can explain or demonstrate the key idea in 'AI and Accessibility' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Project Planning	Period 1: User; problem; success criteria Period 2: Prepare a one-page project plan	Learners can explain or demonstrate the key idea in 'Project Planning' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Build, Test and Improve	Period 1: Prototype; feedback; iteration Period 2: Test with peers and improve	Learners can explain or demonstrate the key idea in 'Build, Test and Improve' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Showcase and Review	Period 1: Demonstration; reflection Period 2: Present project and recap	Learners can explain or demonstrate the key idea in 'Showcase and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Primary 5 — Term 1

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Digital Productivity and File Management	Period 1: Documents; folders; naming conventions Period 2: Create and organise a class project	Learners can explain or demonstrate the key idea in 'Digital Productivity and File Management' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Data Collection and Tables	Period 1: Question design; tally; tabulation Period 2: Collect non-sensitive class data	Learners can explain or demonstrate the key idea in 'Data Collection and Tables' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Spreadsheets and Formulas	Period 1: Cells; SUM/AVERAGE; sorting Period 2: Analyse a small dataset	Learners can explain or demonstrate the key idea in 'Spreadsheets and Formulas' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Charts and Evidence	Period 1: Choose chart; interpret patterns Period 2: Present findings with evidence	Learners can explain or demonstrate the key idea in 'Charts and Evidence' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	What Is Artificial Intelligence?	Period 1: AI definitions; examples/non-examples Period 2: Explain one use and one limitation	Learners can explain or demonstrate the key idea in 'What Is Artificial Intelligence?' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	How AI Uses Examples	Period 1: Data; examples; labels; prediction Period 2: Label a small paper dataset	Learners can explain or demonstrate the key idea in 'How AI Uses Examples' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Classification and Errors	Period 1: Categories; false positives/negatives in simple terms Period 2: Test a card classifier and record errors	Learners can explain or demonstrate the key idea in 'Classification and Errors' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Prompting and Checking	Period 1: Specific instructions; verification Period 2: Compare prompts and check outputs	Learners can explain or demonstrate the key idea in 'Prompting and Checking' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Privacy, Fairness and Safety	Period 1: Personal data; bias; consent Period 2: Analyse an AI-use scenario	Learners can explain or demonstrate the key idea in 'Privacy, Fairness and Safety' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Mini-project and Review	Period 1: Choose local problem; demonstrate and explain Period 2: Present project and recap	Learners can explain or demonstrate the key idea in 'Mini-project and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Primary 5 — Term 2

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Review and Data Quality	Period 1: Missing, duplicated and inconsistent data Period 2: Clean a supplied table	Learners can explain or demonstrate the key idea in 'Review and Data Quality' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Spreadsheets for Analysis	Period 1: Formulas; filters; sorting Period 2: Answer questions from data	Learners can explain or demonstrate the key idea in 'Spreadsheets for Analysis' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Visualisation and Storytelling	Period 1: Chart choice; title; evidence-based conclusion Period 2: Create a short data story	Learners can explain or demonstrate the key idea in 'Visualisation and Storytelling' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Block-Based Coding Extension	Period 1: Events; loops; variables Period 2: Build an interactive quiz	Learners can explain or demonstrate the key idea in 'Block-Based Coding Extension' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Algorithms and Decisions	Period 1: Flowcharts; conditions Period 2: Model a simple recommendation rule	Learners can explain or demonstrate the key idea in 'Algorithms and Decisions' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Machine Learning Simulation	Period 1: Training/test examples; labels Period 2: Simulate learning with paper cards	Learners can explain or demonstrate the key idea in 'Machine Learning Simulation' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Model Evaluation	Period 1: Correct/incorrect predictions; accuracy idea Period 2: Score predictions on new examples	Learners can explain or demonstrate the key idea in 'Model Evaluation' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Responsible AI	Period 1: Fairness; privacy; human review Period 2: Evaluate benefits and risks	Learners can explain or demonstrate the key idea in 'Responsible AI' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Community Problem Design	Period 1: User needs; solution criteria Period 2: Design a low-tech or digital prototype	Learners can explain or demonstrate the key idea in 'Community Problem Design' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Project and Review	Period 1: Build; test; present Period 2: Showcase and assessment	Learners can explain or demonstrate the key idea in 'Project and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Primary 5 — Term 3

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Year Review	Period 1: Data, coding, AI concepts Period 2: Mixed quiz	Learners can explain or demonstrate the key idea in 'Year Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Digital Research and Credibility	Period 1: Source, author, date, evidence Period 2: Compare sources and justify trust	Learners can explain or demonstrate the key idea in 'Digital Research and Credibility' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Generative AI Basics	Period 1: Text/image generation concept; limits Period 2: Analyse teacher-provided outputs	Learners can explain or demonstrate the key idea in 'Generative AI Basics' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Prompt Design	Period 1: Goal; context; constraints; iteration Period 2: Revise a prompt and compare outputs	Learners can explain or demonstrate the key idea in 'Prompt Design' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	AI Hallucinations and Verification	Period 1: Plausible error; fact-checking Period 2: Check claims against trusted sources	Learners can explain or demonstrate the key idea in 'AI Hallucinations and Verification' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Bias and Representation	Period 1: Unbalanced examples; unfair outcomes Period 2: Improve sample data and explain why	Learners can explain or demonstrate the key idea in 'Bias and Representation' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Data Privacy and Consent	Period 1: Sensitive data; permission; safe sharing Period 2: Create a safe-use checklist	Learners can explain or demonstrate the key idea in 'Data Privacy and Consent' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Project Proposal	Period 1: Problem; audience; success measure Period 2: Write proposal for local school/community need	Learners can explain or demonstrate the key idea in 'Project Proposal' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Prototype and Evaluation	Period 1: Build; test; feedback; improvement Period 2: Test prototype and document results	Learners can explain or demonstrate the key idea in 'Prototype and Evaluation' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Presentation and Review	Period 1: Portfolio selection; reflection Period 2: Present learning and complete recap	Learners can explain or demonstrate the key idea in 'Presentation and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Primary 6 — Term 1

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Digital Systems and Networks	Period 1: Devices; operating systems; connectivity Period 2: Explain a simple digital workflow	Learners can explain or demonstrate the key idea in 'Digital Systems and Networks' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Productivity and Collaboration	Period 1: Documents; presentations; file sharing safety Period 2: Create a short presentation	Learners can explain or demonstrate the key idea in 'Productivity and Collaboration' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Data Collection and Representation	Period 1: Survey questions; tables; charts Period 2: Collect and chart non-sensitive data	Learners can explain or demonstrate the key idea in 'Data Collection and Representation' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Algorithms and Flowcharts	Period 1: Sequence; branching; loops Period 2: Model a school-based process	Learners can explain or demonstrate the key idea in 'Algorithms and Flowcharts' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Block Coding Project	Period 1: Variables; events; conditions Period 2: Build a small educational game	Learners can explain or demonstrate the key idea in 'Block Coding Project' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	AI Concepts and Applications	Period 1: AI systems; examples; limitations Period 2: Explain how an AI application helps a user	Learners can explain or demonstrate the key idea in 'AI Concepts and Applications' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Data and Model Training	Period 1: Labels; training/test examples Period 2: Create and test a paper classifier	Learners can explain or demonstrate the key idea in 'Data and Model Training' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	AI Safety and Digital Citizenship	Period 1: Privacy; misinformation; cyberbullying Period 2: Respond to case studies	Learners can explain or demonstrate the key idea in 'AI Safety and Digital Citizenship' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Designing a Community Helper	Period 1: User need; prototype; success criteria Period 2: Plan a simple solution	Learners can explain or demonstrate the key idea in 'Designing a Community Helper' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Project Presentation and Review	Period 1: Demonstration; reflection; recap Period 2: Present project and complete assessment	Learners can explain or demonstrate the key idea in 'Project Presentation and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Primary 6 — Term 2

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Review and Data Quality	Period 1: Accuracy; bias; missing values Period 2: Inspect a dataset	Learners can explain or demonstrate the key idea in 'Review and Data Quality' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Spreadsheets and Functions	Period 1: SUM; AVERAGE; IF concept Period 2: Solve practical data questions	Learners can explain or demonstrate the key idea in 'Spreadsheets and Functions' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Charts and Communication	Period 1: Chart selection; interpretation Period 2: Present a data-based recommendation	Learners can explain or demonstrate the key idea in 'Charts and Communication' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Web Page Structure	Period 1: Headings; paragraphs; links; images Period 2: Plan a simple awareness page	Learners can explain or demonstrate the key idea in 'Web Page Structure' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Programming Logic	Period 1: Variables; conditions; loops Period 2: Extend a block-code project	Learners can explain or demonstrate the key idea in 'Programming Logic' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	AI Classification	Period 1: Features; labels; predictions Period 2: Test classifier using local examples	Learners can explain or demonstrate the key idea in 'AI Classification' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Evaluation and Improvement	Period 1: Test set; errors; iteration Period 2: Record results and improve examples	Learners can explain or demonstrate the key idea in 'Evaluation and Improvement' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Responsible AI Design	Period 1: Privacy; fairness; accessibility Period 2: Complete an ethical design checklist	Learners can explain or demonstrate the key idea in 'Responsible AI Design' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Capstone Build	Period 1: Prototype; teamwork; documentation Period 2: Build and test project	Learners can explain or demonstrate the key idea in 'Capstone Build' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Capstone Showcase and Review	Period 1: Explain problem; demo; limitations Period 2: Present project and reflect	Learners can explain or demonstrate the key idea in 'Capstone Showcase and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

Primary 6 — Term 3

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Year Review and Transition	Period 1: Key digital, coding and AI ideas Period 2: Readiness quiz	Learners can explain or demonstrate the key idea in 'Year Review and Transition' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Computational Thinking	Period 1: Decomposition; patterns; algorithms Period 2: Break a problem into steps	Learners can explain or demonstrate the key idea in 'Computational Thinking' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Python/Block-Code Bridge	Period 1: Variables; input/output; sequence Period 2: Translate a block algorithm into plain-language steps	Learners can explain or demonstrate the key idea in 'Python/Block-Code Bridge' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	AI and Future Learning	Period 1: AI uses; limits; human judgement Period 2: Evaluate a tool for a learning task	Learners can explain or demonstrate the key idea in 'AI and Future Learning' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Digital Research and Integrity	Period 1: Sources; citation; plagiarism Period 2: Prepare a properly credited mini-report	Learners can explain or demonstrate the key idea in 'Digital Research and Integrity' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Data Privacy and Security	Period 1: Passwords; phishing; permission Period 2: Identify risks in sample messages	Learners can explain or demonstrate the key idea in 'Data Privacy and Security' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Project Planning	Period 1: Problem statement; audience; metrics Period 2: Prepare project plan	Learners can explain or demonstrate the key idea in 'Project Planning' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Build and Test	Period 1: Prototype; feedback; improvement Period 2: Test and record findings	Learners can explain or demonstrate the key idea in 'Build and Test' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Final Portfolio	Period 1: Select artefacts; describe learning Period 2: Prepare portfolio with teacher guidance	Learners can explain or demonstrate the key idea in 'Final Portfolio' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Transition Showcase	Period 1: Presentation; next-stage goals Period 2: Showcase work and reflect	Learners can explain or demonstrate the key idea in 'Transition Showcase' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

JSS 1 — Term 1

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Computer and Society	Period 1: Brief history; computers in Nigeria today Period 2: Uses in school, bank, hospital and market	Learners can explain or demonstrate the key idea in 'Computer and Society' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	System Unit and Peripherals	Period 1: Parts and their functions Period 2: Label and assemble a practice setup	Learners can explain or demonstrate the key idea in 'System Unit and Peripherals' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	The Operating System	Period 1: Files, folders, desktop Period 2: Organise a practice folder tree	Learners can explain or demonstrate the key idea in 'The Operating System' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Word Processing	Period 1: Create, format and save a document Period 2: Produce a one-page composition	Learners can explain or demonstrate the key idea in 'Word Processing' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Internet and Email	Period 1: Browse safely; sending email Period 2: Compose a practice email	Learners can explain or demonstrate the key idea in 'Internet and Email' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	What Is AI?	Period 1: Definition and everyday examples Period 2: AI spotting walk: list five AI touches	Learners can explain or demonstrate the key idea in 'What Is AI?' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	AI in Nigerian Services	Period 1: Bank fraud alerts, POS, traffic and farm apps Period 2: Match each app to the problem it solves	Learners can explain or demonstrate the key idea in 'AI in Nigerian Services' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Classification	Period 1: Grouping by rules; spam filters Period 2: Sort mixed sample mail into keep and junk	Learners can explain or demonstrate the key idea in 'Classification' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Collecting Data	Period 1: Class survey into a table Period 2: Run and record the survey	Learners can explain or demonstrate the key idea in 'Collecting Data' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Project and Revision	Period 1: Present survey; recap quiz Period 2: Complete project review and assessment	Learners can explain or demonstrate the key idea in 'Project and Revision' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

JSS 1 — Term 2

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Recap	Period 1: Quiz on first term Period 2: Team quiz	Learners can explain or demonstrate the key idea in 'Recap' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Spreadsheets Basics	Period 1: Cells, rows, simple formulas Period 2: Enter survey data and total it	Learners can explain or demonstrate the key idea in 'Spreadsheets Basics' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Charts	Period 1: Bar and pie charts Period 2: Chart the survey two ways	Learners can explain or demonstrate the key idea in 'Charts' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Scratch: Interface	Period 1: Stage, sprites, blocks Period 2: Explore with a first animation	Learners can explain or demonstrate the key idea in 'Scratch: Interface' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Sequences	Period 1: Step-by-step programs Period 2: Build a two-step story	Learners can explain or demonstrate the key idea in 'Sequences' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Loops	Period 1: Repeats Period 2: Dance loop challenge	Learners can explain or demonstrate the key idea in 'Loops' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Variables	Period 1: Store and change values Period 2: Add a score counter	Learners can explain or demonstrate the key idea in 'Variables' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Conditions	Period 1: If-then decisions Period 2: Build a quiz that reacts	Learners can explain or demonstrate the key idea in 'Conditions' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Number Systems	Period 1: Binary and decimal basics Period 2: Unplugged binary cards: count to 31	Learners can explain or demonstrate the key idea in 'Number Systems' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Project and Revision	Period 1: Finish and present a Scratch project Period 2: Recap quiz and assessment	Learners can explain or demonstrate the key idea in 'Project and Revision' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

JSS 1 — Term 3

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Recap	Period 1: Review of second term Period 2: Quiz relay	Learners can explain or demonstrate the key idea in 'Recap' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Presentations	Period 1: Slide design and delivery Period 2: Build and present a three-slide deck	Learners can explain or demonstrate the key idea in 'Presentations' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Scratch Game	Period 1: Build and share a game Period 2: Play-test classmates' games	Learners can explain or demonstrate the key idea in 'Scratch Game' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Algorithms	Period 1: Definition; everyday examples Period 2: Write the algorithm for cooking a meal	Learners can explain or demonstrate the key idea in 'Algorithms' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Flowcharts	Period 1: Symbols and practice Period 2: Flowchart the school day	Learners can explain or demonstrate the key idea in 'Flowcharts' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Pseudocode	Period 1: Steps in structured plain words Period 2: Turn two flowcharts into pseudocode	Learners can explain or demonstrate the key idea in 'Pseudocode' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	AI Ethics	Period 1: Fairness and privacy Period 2: Case discussion: the biased model	Learners can explain or demonstrate the key idea in 'AI Ethics' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Digital Citizenship	Period 1: Netiquette and cyberbullying Period 2: Scenario responses	Learners can explain or demonstrate the key idea in 'Digital Citizenship' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	E-waste	Period 1: Recycling and health Period 2: Design an e-waste poster	Learners can explain or demonstrate the key idea in 'E-waste' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Project and Revision	Period 1: Present the term's work Period 2: Recap the year and assess	Learners can explain or demonstrate the key idea in 'Project and Revision' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

JSS 2 — Term 1

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Networks and the Internet	Period 1: LAN, WAN, ISPs in Nigeria Period 2: Compare two local data plans	Learners can explain or demonstrate the key idea in 'Networks and the Internet' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Web Browsing and Search	Period 1: Advanced search; evaluating sites Period 2: Rank three results and justify	Learners can explain or demonstrate the key idea in 'Web Browsing and Search' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Introduction to HTML	Period 1: Tags, headings, paragraphs Period 2: Build an 'About Me' page using safe fictional details	Learners can explain or demonstrate the key idea in 'Introduction to HTML' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Scratch: Events and Messages	Period 1: Broadcasting; interactive stories Period 2: Build a choose-your-path story	Learners can explain or demonstrate the key idea in 'Scratch: Events and Messages' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Data and Information	Period 1: Types; qualities of good data Period 2: Good vs bad data sorting exercise	Learners can explain or demonstrate the key idea in 'Data and Information' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Python First Steps	Period 1: print and input Period 2: Write a greeting program	Learners can explain or demonstrate the key idea in 'Python First Steps' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	AI in the Real World	Period 1: Speech and image recognition demonstrations Period 2: Test two tools; record strengths and errors	Learners can explain or demonstrate the key idea in 'AI in the Real World' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Recommendation Systems	Period 1: How video apps and shops suggest Period 2: Trace one suggestion to its possible cause	Learners can explain or demonstrate the key idea in 'Recommendation Systems' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Data Collection with Forms	Period 1: Create a supervised survey form Period 2: Run a non-sensitive school survey	Learners can explain or demonstrate the key idea in 'Data Collection with Forms' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Project and Revision	Period 1: Present form results Period 2: Recap quiz and assessment	Learners can explain or demonstrate the key idea in 'Project and Revision' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

JSS 2 — Term 2

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Recap and Python Setup	Period 1: Review first-term ideas; interpreter/editor Period 2: Run a simple program	Learners can explain or demonstrate the key idea in 'Recap and Python Setup' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Python Variables and Types	Period 1: Strings, integers, floats Period 2: Store and display survey information	Learners can explain or demonstrate the key idea in 'Python Variables and Types' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Conditions and Loops	Period 1: if/else; for/while concept Period 2: Build a number guessing or quiz task	Learners can explain or demonstrate the key idea in 'Conditions and Loops' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Functions	Period 1: Reusable blocks of code; parameters idea Period 2: Write a simple helper function	Learners can explain or demonstrate the key idea in 'Functions' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Data in Spreadsheets and Python	Period 1: Rows, columns, lists Period 2: Compare spreadsheet and list representations	Learners can explain or demonstrate the key idea in 'Data in Spreadsheets and Python' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Chatbots and Dialogue	Period 1: Question/response patterns; limits Period 2: Design a rule-based school FAQ bot	Learners can explain or demonstrate the key idea in 'Chatbots and Dialogue' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Machine Learning Introduction	Period 1: Examples versus rules Period 2: Simulate a classifier using labelled cards or a safe demo	Learners can explain or demonstrate the key idea in 'Machine Learning Introduction' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Training and Testing	Period 1: Training examples; unseen examples Period 2: Record correct and incorrect predictions	Learners can explain or demonstrate the key idea in 'Training and Testing' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	AI Ethics and Privacy	Period 1: Consent, bias, data minimisation Period 2: Analyse a case study	Learners can explain or demonstrate the key idea in 'AI Ethics and Privacy' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Mini-project and Revision	Period 1: Build, test, present Period 2: Review and assess	Learners can explain or demonstrate the key idea in 'Mini-project and Revision' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

JSS 2 — Term 3

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Review and Algorithms	Period 1: Sequences; decisions; repetition Period 2: Solve an algorithm challenge	Learners can explain or demonstrate the key idea in 'Review and Algorithms' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Python Lists	Period 1: Create, access and update list items Period 2: Build a simple list-based program	Learners can explain or demonstrate the key idea in 'Python Lists' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Dictionaries and Structured Data	Period 1: Key/value pairs; lookup Period 2: Create a small fictional school-club directory	Learners can explain or demonstrate the key idea in 'Dictionaries and Structured Data' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Web Pages with CSS	Period 1: Selectors; colours; layout Period 2: Style an information page	Learners can explain or demonstrate the key idea in 'Web Pages with CSS' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Interactive Web Forms	Period 1: Inputs; buttons; validation idea Period 2: Build a feedback form without collecting sensitive data	Learners can explain or demonstrate the key idea in 'Interactive Web Forms' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Data Visualisation	Period 1: Chart types; truthful presentation Period 2: Visualise a supplied dataset	Learners can explain or demonstrate the key idea in 'Data Visualisation' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	AI Misinformation	Period 1: Fake news; deepfakes; source checking Period 2: Fact-check three sample claims	Learners can explain or demonstrate the key idea in 'AI Misinformation' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	AI Bias and Fairness	Period 1: Representation; unequal errors Period 2: Inspect a simple classification scenario	Learners can explain or demonstrate the key idea in 'AI Bias and Fairness' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Community Data Project	Period 1: Question; collect; analyse; chart Period 2: Create a data-informed report	Learners can explain or demonstrate the key idea in 'Community Data Project' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Project and Revision	Period 1: Present project; recap Period 2: Assessment and reflection	Learners can explain or demonstrate the key idea in 'Project and Revision' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

JSS 3 — Term 1

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	BECE Warm-up	Period 1: Key ICT concepts revision Period 2: Rapid mixed quiz	Learners can explain or demonstrate the key idea in 'BECE Warm-up' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Algorithms and Efficiency	Period 1: Best path; sorting cards Period 2: Race two sorting methods	Learners can explain or demonstrate the key idea in 'Algorithms and Efficiency' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Python Functions and Modules	Period 1: Reuse code Period 2: Build a maths-helpers module	Learners can explain or demonstrate the key idea in 'Python Functions and Modules' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Lists and Dictionaries	Period 1: Organised data Period 2: Create a fictional student-record program	Learners can explain or demonstrate the key idea in 'Lists and Dictionaries' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Web Pages with Forms	Period 1: Inputs and buttons Period 2: Build a feedback form page	Learners can explain or demonstrate the key idea in 'Web Pages with Forms' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	AI and Society	Period 1: Jobs, bias and benefits Period 2: Structured debate with evidence	Learners can explain or demonstrate the key idea in 'AI and Society' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Misinformation	Period 1: How it spreads; fact-checking Period 2: Fact-check three sample posts	Learners can explain or demonstrate the key idea in 'Misinformation' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Data Project	Period 1: Plan a survey and analysis Period 2: Run survey and chart it	Learners can explain or demonstrate the key idea in 'Data Project' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Python Mini-project	Period 1: Quiz game design Period 2: Build and demonstrate the game	Learners can explain or demonstrate the key idea in 'Python Mini-project' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Project and Revision	Period 1: Present work; mixed recap Period 2: Consolidate and assess	Learners can explain or demonstrate the key idea in 'Project and Revision' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

JSS 3 — Term 2

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Recap	Period 1: Quiz on first term Period 2: Team quiz	Learners can explain or demonstrate the key idea in 'Recap' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Python Mini-projects	Period 1: Calculator or story generator Period 2: Build one and extend it	Learners can explain or demonstrate the key idea in 'Python Mini-projects' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	APIs: The Idea	Period 1: Apps talking to apps; request/response Period 2: Walk through a safe, teacher-led API example	Learners can explain or demonstrate the key idea in 'APIs: The Idea' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Cloud Computing Concepts	Period 1: What cloud services do; risks and costs Period 2: Compare local and cloud storage	Learners can explain or demonstrate the key idea in 'Cloud Computing Concepts' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	Version Control	Period 1: Saving versions of code Period 2: Simulate commit and revert with versioned files	Learners can explain or demonstrate the key idea in 'Version Control' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Machine Learning: Classification	Period 1: Train a text or image classifier conceptually Period 2: Use a safe demo or labelled-card dataset	Learners can explain or demonstrate the key idea in 'Machine Learning: Classification' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Data Cleaning	Period 1: Fix messy data Period 2: Clean a supplied non-personal dataset	Learners can explain or demonstrate the key idea in 'Data Cleaning' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Bias in AI	Period 1: Case studies; fairness tests Period 2: Diagnose a biased outcome	Learners can explain or demonstrate the key idea in 'Bias in AI' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Capstone Planning	Period 1: Problem; user; requirements Period 2: Write a project plan and test criteria	Learners can explain or demonstrate the key idea in 'Capstone Planning' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Project and Revision	Period 1: Build/demo; review Period 2: Assess and reflect	Learners can explain or demonstrate the key idea in 'Project and Revision' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

JSS 3 — Term 3

Weekly allocation: 2 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	BECE Preparation and Review	Period 1: Core ICT concepts; practice questions Period 2: Mixed quiz and clarification	Learners can explain or demonstrate the key idea in 'BECE Preparation and Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
2	Algorithms and Debugging	Period 1: Trace logic; find errors Period 2: Solve timed paper-based tasks	Learners can explain or demonstrate the key idea in 'Algorithms and Debugging' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
3	Python and Data Review	Period 1: Functions; lists; dictionaries Period 2: Complete a short practical exercise	Learners can explain or demonstrate the key idea in 'Python and Data Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
4	Web and Digital Citizenship Review	Period 1: Forms; safe publishing; source checks Period 2: Review scenarios	Learners can explain or demonstrate the key idea in 'Web and Digital Citizenship Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
5	AI Concepts Review	Period 1: Data; classification; limits Period 2: Explain model errors	Learners can explain or demonstrate the key idea in 'AI Concepts Review' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
6	Practical Skills Clinic	Period 1: File management; spreadsheets; coding Period 2: Complete a practical checklist	Learners can explain or demonstrate the key idea in 'Practical Skills Clinic' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
7	Project Documentation	Period 1: Problem; method; testing; limitations Period 2: Write a short technical report	Learners can explain or demonstrate the key idea in 'Project Documentation' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
8	Capstone Testing	Period 1: Test cases; peer feedback Period 2: Improve and document prototype	Learners can explain or demonstrate the key idea in 'Capstone Testing' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
9	Portfolio and Presentation	Period 1: Select artefacts; explain choices Period 2: Practise presentation/viva	Learners can explain or demonstrate the key idea in 'Portfolio and Presentation' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
10	Transition and Revision	Period 1: Further study; exam recap Period 2: Final review, subject to school calendar	Learners can explain or demonstrate the key idea in 'Transition and Revision' and apply it to a guided example.	Oral/written check, practical task or short exit ticket.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

SSS 1 — Term 1

Weekly allocation: 3 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Python Fundamentals	Period 1: Variables, types, input/output Period 2: Write and run simple programs Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Python Fundamentals' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
2	Control Flow	Period 1: Conditions and loops Period 2: Solve decision and repetition problems Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Control Flow' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
3	Functions and Modular Code	Period 1: Define functions; parameters; return values Period 2: Build reusable helper functions Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Functions and Modular Code' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
4	Data Structures	Period 1: Lists, tuples, dictionaries Period 2: Represent a small dataset Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Data Structures' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
5	Data Analysis with Spreadsheets/Python	Period 1: Rows, columns, filtering Period 2: Explore a supplied dataset Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Data Analysis with Spreadsheets/Python' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
6	Statistics for AI	Period 1: Mean, median, mode; distribution Period 2: Calculate and interpret summary statistics Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Statistics for AI' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
7	AI and Machine Learning	Period 1: AI, ML, rules-based systems Period 2: Classify example applications Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'AI and Machine Learning' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
8	Supervised Learning	Period 1: Features, labels, training/test sets Period 2: Simulate a supervised-learning workflow Period 3: Guided practical,	Learners can explain, apply and document the key idea in 'Supervised Learning' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
		testing, analysis, documentation or extension of the week's concept.		
9	Model Evaluation	Period 1: Accuracy, confusion matrix concept Period 2: Evaluate predictions and identify errors Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Model Evaluation' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
10	Mini-project and Review	Period 1: Plan, build, document and present Period 2: Present project and review Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Mini-project and Review' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

SSS 1 — Term 2

Weekly allocation: 3 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Data Cleaning	Period 1: Missing values, duplicates, inconsistent formats Period 2: Clean a supplied dataset Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Data Cleaning' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
2	Exploratory Data Analysis	Period 1: Summary statistics; patterns; outliers Period 2: Create an exploratory report Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Exploratory Data Analysis' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
3	Visualisation	Period 1: Bar, line, scatter plots Period 2: Tell a data story with evidence Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Visualisation' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
4	Classification Models	Period 1: Features; labels; decision boundaries concept Period 2: Train/test a simple supervised classifier where resources permit Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Classification Models' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
5	Regression	Period 1: Predicting numeric values; fit and error Period 2: Explore a simple trend/prediction task Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Regression' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
6	Model Evaluation and Overfitting	Period 1: Train/test separation; generalisation Period 2: Compare model results carefully Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Model Evaluation and Overfitting' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
7	Web Foundations	Period 1: HTML structure; CSS; JavaScript basics Period 2: Build a simple portfolio page Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Web Foundations' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
8	Databases and SQL	Period 1: Tables; records; queries	Learners can explain, apply and document the	Practical evidence, notebook/portfolio, short

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
		Period 2: Query a small fictional dataset Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	key idea in 'Databases and SQL' using an appropriate practical example.	quiz or documented result.
9	Ethics, Privacy and Bias	Period 1: Data rights; fairness; accountability Period 2: Complete an AI risk review Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Ethics, Privacy and Bias' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
10	Project and Review	Period 1: Combine analysis and communication Period 2: Present and assess Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Project and Review' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

SSS 1 — Term 3

Weekly allocation: 3 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Review of Data and Python	Period 1: Core syntax; statistics; data handling Period 2: Practical recap Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Review of Data and Python' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
2	AI System Design	Period 1: Problem definition; user needs; constraints Period 2: Write a system brief Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'AI System Design' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
3	Data Pipeline Basics	Period 1: Collect; clean; split; document Period 2: Map a small data workflow Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Data Pipeline Basics' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
4	NLP Concepts	Period 1: Text tokens; classification; sentiment concept Period 2: Analyse a safe sample text dataset Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'NLP Concepts' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
5	Computer Vision Concepts	Period 1: Pixels; image labels; limitations Period 2: Explore a teacher-approved demo or paper simulation Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Computer Vision Concepts' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
6	APIs and Applications	Period 1: Request/response; service integration concept Period 2: Design an API flow diagram Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'APIs and Applications' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
7	Responsible AI Design	Period 1: Privacy; bias; human oversight Period 2: Review system risks Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Responsible AI Design' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
8	Portfolio Development	Period 1: README; code comments; evidence Period 2: Document a project	Learners can explain, apply and document the key idea in 'Portfolio Development' using an	Practical evidence, notebook/portfolio, short quiz or documented result.

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
		Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	appropriate practical example.	
9	Capstone Prototype	Period 1: Build; test; evaluate Period 2: Collect test results and feedback Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Capstone Prototype' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
10	Presentation and Review	Period 1: Technical explanation; limitations Period 2: Present prototype and complete assessment Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Presentation and Review' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

SSS 2 — Term 1

Weekly allocation: 3 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Python for Data Work	Period 1: Functions; modules; files Period 2: Write a small data-processing script Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Python for Data Work' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
2	Data Cleaning and Preparation	Period 1: Missing data; duplicates; types Period 2: Clean a supplied dataset Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Data Cleaning and Preparation' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
3	Exploratory Analysis	Period 1: Summary statistics; relationships Period 2: Generate a short findings report Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Exploratory Analysis' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
4	Data Visualisation	Period 1: Chart choice; labels; misleading charts Period 2: Build clear charts Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Data Visualisation' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
5	Machine Learning Workflow	Period 1: Problem; data; training; testing Period 2: Map an end-to-end workflow Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Machine Learning Workflow' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
6	Classification	Period 1: Labels; features; model outputs Period 2: Train/evaluate a simple classifier if devices permit Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Classification' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
7	Regression	Period 1: Numeric prediction; error metrics concept Period 2: Compare predictions with known values Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Regression' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
8	Model Evaluation	Period 1: Accuracy; precision/recall concepts; confusion matrix Period 2: Interpret model performance	Learners can explain, apply and document the key idea in 'Model Evaluation' using an appropriate practical	Practical evidence, notebook/portfolio, short quiz or documented result.

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
		Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	example.	
9	Fairness and Privacy	Period 1: Bias; consent; minimisation Period 2: Conduct an ethical review Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Fairness and Privacy' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
10	Project and Revision	Period 1: Prototype; report; presentation Period 2: Present and assess Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Project and Revision' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

SSS 2 — Term 2

Weekly allocation: 3 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Natural Language Processing	Period 1: Text cleaning; tokens; classification Period 2: Analyse a safe text dataset Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Natural Language Processing' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
2	Computer Vision	Period 1: Image features; labels; error cases Period 2: Evaluate a teacher-approved image demo Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Computer Vision' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
3	APIs and AI Applications	Period 1: Service calls; inputs/outputs; security Period 2: Design or build a simple integration where possible Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'APIs and AI Applications' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
4	Web App Foundations	Period 1: HTML/CSS/JavaScript; form handling Period 2: Build an interface for a project Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Web App Foundations' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
5	Databases and SQL	Period 1: Tables; SELECT; filtering; joins concept Period 2: Query a fictional dataset Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Databases and SQL' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
6	Deployment Concepts	Period 1: Local versus hosted; configuration; cost Period 2: Draw a deployment plan Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Deployment Concepts' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
7	Testing and Reliability	Period 1: Test cases; edge cases; error logging Period 2: Create a test plan Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Testing and Reliability' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
8	Security and Privacy	Period 1: Credentials; access; data handling Period 2: Review a	Learners can explain, apply and document the key idea in 'Security and	Practical evidence, notebook/portfolio, short quiz or documented result.

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
		security scenario Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Privacy' using an appropriate practical example.	
9	Project Build Sprint	Period 1: Prototype; integrate; document Period 2: Test and improve the app Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Project Build Sprint' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
10	Review and Demonstration	Period 1: Demo; limitations; feedback Period 2: Present project and reflect Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Review and Demonstration' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

SSS 2 — Term 3

Weekly allocation: 3 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Review and Project Selection	Period 1: User need; feasibility; success measures Period 2: Select and justify a project Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Review and Project Selection' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
2	Proposal and Research	Period 1: Background; source quality; scope Period 2: Write a proposal Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Proposal and Research' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
3	Data Acquisition and Documentation	Period 1: Data source; permission; data dictionary Period 2: Document a permitted dataset Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Data Acquisition and Documentation' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
4	Model or Rule Design	Period 1: Baseline; model choice; alternatives Period 2: Build a baseline approach Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Model or Rule Design' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
5	Training and Evaluation	Period 1: Train/test separation; metrics Period 2: Record and interpret results Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Training and Evaluation' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
6	Application Integration	Period 1: Interface; data flow; error handling Period 2: Connect components or simulate integration Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Application Integration' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
7	Responsible AI Audit	Period 1: Bias; privacy; accessibility; misuse Period 2: Complete an audit checklist Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Responsible AI Audit' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
8	User Testing	Period 1: Feedback; usability; test evidence Period 2: Conduct supervised user tests Period 3: Guided practical, testing, analysis,	Learners can explain, apply and document the key idea in 'User Testing' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
		documentation or extension of the week's concept.		
9	Technical Report and Portfolio	Period 1: Methods; results; limitations; citations Period 2: Draft report and portfolio Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Technical Report and Portfolio' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
10	Project Presentation and Review	Period 1: Demo; questions; reflection Period 2: Present project and review Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Project Presentation and Review' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

SSS 3 — Term 1

Weekly allocation: 3 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Python and AI Foundations Review	Period 1: Core Python; data structures; functions Period 2: Mixed practical exercises Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Python and AI Foundations Review' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
2	Algorithms and Data Handling	Period 1: Complexity intuition; efficient data processing Period 2: Compare alternative solutions Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Algorithms and Data Handling' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
3	Data Quality and Governance	Period 1: Provenance; consent; minimisation Period 2: Audit a sample dataset Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Data Quality and Governance' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
4	Machine Learning Workflow	Period 1: Problem framing; baseline; train/test Period 2: Document workflow decisions Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Machine Learning Workflow' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
5	Model Evaluation	Period 1: Metrics; errors; limitations Period 2: Interpret model results Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Model Evaluation' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
6	Deployment and Monitoring Concepts	Period 1: Versioning; monitoring; failure response Period 2: Draw a deployment and monitoring plan Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Deployment and Monitoring Concepts' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
7	AI Ethics and Accountability	Period 1: Fairness; transparency; human oversight Period 2: Write an impact assessment Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'AI Ethics and Accountability' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
8	Career and Further Study Pathways	Period 1: AI roles; portfolios; credentials Period 2: Map personal	Learners can explain, apply and document the key idea in 'Career and	Practical evidence, notebook/portfolio, short quiz or documented result.

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
		learning goals Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Further Study Pathways' using an appropriate practical example.	
9	Capstone Development	Period 1: Build; test; document Period 2: Complete prototype and evidence Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Capstone Development' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
10	Capstone Presentation and Revision	Period 1: Demo; report; viva practice Period 2: Present capstone and review Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Capstone Presentation and Revision' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

SSS 3 — Term 2

Weekly allocation: 3 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Capstone Scope and Proposal	Period 1: Problem; users; success criteria Period 2: Approve project plan with teacher Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Capstone Scope and Proposal' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
2	Data and Literature Review	Period 1: Source evaluation; permissions; citations Period 2: Document evidence and data source Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Data and Literature Review' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
3	Prototype Architecture	Period 1: Components; data flow; risk controls Period 2: Draw architecture and plan Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Prototype Architecture' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
4	Implementation Sprint 1	Period 1: Core feature; version control Period 2: Build and document progress Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Implementation Sprint 1' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
5	Implementation Sprint 2	Period 1: Additional feature; error handling Period 2: Extend and test prototype Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Implementation Sprint 2' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
6	Evaluation Plan	Period 1: Test cases; metrics; user feedback Period 2: Prepare evaluation instruments Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Evaluation Plan' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
7	Testing and Iteration	Period 1: Run tests; log failures; improve Period 2: Produce test evidence Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Testing and Iteration' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
8	Ethics and Safety Review	Period 1: Privacy; fairness; security; limitations Period 2: Complete risk register Period 3: Guided practical, testing, analysis,	Learners can explain, apply and document the key idea in 'Ethics and Safety Review' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
		documentation or extension of the week's concept.		
9	Technical Report	Period 1: Methods; results; discussion; references Period 2: Draft final report Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Technical Report' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
10	Showcase Preparation	Period 1: Demo; presentation; viva Period 2: Rehearse and complete portfolio Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Showcase Preparation' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

SSS 3 — Term 3

Weekly allocation: 3 periods | Weeks 1–10 teaching and assessment | Weeks 11–13 examination/administration

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
1	Final Portfolio Review	Period 1: Code/artifacts; documentation; reflections Period 2: Audit portfolio completeness Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Final Portfolio Review' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
2	Capstone Finalisation	Period 1: Resolve defects; verify claims Period 2: Freeze final version and evidence Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Capstone Finalisation' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
3	Technical Report Finalisation	Period 1: Results; limitations; citations Period 2: Submit report Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Technical Report Finalisation' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
4	Capstone Showcase	Period 1: Demonstration; presentation Period 2: Present project to school audience Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Capstone Showcase' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
5	Viva and Reflection	Period 1: Explain design; answer questions Period 2: Reflect on strengths and improvements Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Viva and Reflection' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
6	Career and Admissions Clinics	Period 1: Further study; applications; portfolios Period 2: Prepare next-step plan Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Career and Admissions Clinics' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
7	Certification and Skills Mapping	Period 1: Map skills to learning pathways Period 2: Identify gaps and next learning steps Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Certification and Skills Mapping' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
8	Community Impact Reflection	Period 1: User value; sustainability; inclusion Period 2: Write impact reflection Period 3: Guided practical, testing, analysis, documentation or	Learners can explain, apply and document the key idea in 'Community Impact Reflection' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.

Week	Topic	Subtopics / period allocation	Learning outcome	Assessment / evidence
		extension of the week's concept.		
9	Transition Planning	Period 1: Portfolio access; backups; future goals Period 2: Prepare transition checklist Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Transition Planning' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
10	Year-End Review	Period 1: Lessons learned; programme feedback Period 2: Complete programme evaluation, subject to actual external-exam calendar Period 3: Guided practical, testing, analysis, documentation or extension of the week's concept.	Learners can explain, apply and document the key idea in 'Year-End Review' using an appropriate practical example.	Practical evidence, notebook/portfolio, short quiz or documented result.
11	Examinations	Conduct the school's approved end-of-term examination or practical assessment using the taught content. No new topic.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
12	Marking and computation	Mark scripts/practicals; moderate where appropriate; compute continuous-assessment and examination results; check records.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.
13	Results, records and closure	Review results; update records; communicate outcomes according to school policy; complete closure and programme feedback.	Complete the required end-of-term school process.	Exam scripts, marking records, result sheets or closure checklist.

5. Implementation and quality-control checklist

- Head of school confirms the weekly timetable and term dates before the term begins.
- Subject teacher checks that Weeks 1–10 cover the planned content without relying on examination weeks.
- Teacher prepares offline alternatives and confirms that software/tools are age-appropriate and permitted by school policy.
- All practical data are synthetic, anonymised or collected with proper school permission; no personal learner data are entered into public tools.
- Week 9 is used to consolidate and catch up; Week 10 is used for project completion, revision and/or continuous assessment.
- Week 11 examination coverage matches the topics actually taught and the school's approved assessment policy.
- Weeks 12–13 are reserved for marking, computation, records, results and closure tasks.
- Teachers record changes made due to public holidays, school events, device access or examination-board dates.
- The curriculum remains labelled 'Proposed Rehoteq Curriculum' until the relevant authorities confirm approval and alignment.

6. Source and alignment note

Source basis: user-provided PDF, Rehoteq AI Curriculum: Secondary (JSS 1 to SSS 3), Edition 2.0, Scheme of Work, Session 2026/2027; and the Rehoteq AI Education Curriculum Master Framework Draft 1.0. Secondary scheme topics such as Computer and Society, Spreadsheets, Scratch, Algorithms, Python, Data Cleaning, Machine Learning, AI Ethics, Web Development and Capstone Projects follow or extend the supplied Rehoteq material. Primary weekly content is proposed and should be reviewed by primary teachers and curriculum specialists. This document is not a substitute for checking the current official NERDC curriculum, school calendar, or examination-board requirements.
